UNIT OUTLINE

Unit Index: 310362
Credit Value: 50 credit points

Core Unit:
This is a core unit specific to Master of Petroleum Well Engineering.
A Core Unit is a compulsory unit. Failure twice may lead to the termination from that course.

Pre-, Co-, Anti-requisite/s:

Pre-requisite/s:
308068 (v.1) Drilling Engineering Fundamentals 603
308069 (v.1) Advanced Drilling Practices 604
308072 (v.1) Advanced Drilling Techniques 608

Co-requisite/s:
None.

Anti-requisite/s:
None.

Additional Requirement/s:
None.

Availability Details: In 2008, this unit will be offered internally in Quarter 4 through Curtin Engineering.

Online Teaching Unit Category: Informational.

Unit Learning Outcomes: On completion of this unit you should be able to demonstrate your achievement of the following learning outcomes:

1. Apply the knowledge gained in this discipline area to a range of relevant engineering issues.
2. Approach problems in a logical way and be able to formulate an optimum solution.
3. Decide what data / information is relevant from a range of sources, how these relate to each other and identify inconsistencies.
4. Work clearly and concisely, and be able to communicate your findings in a variety of ways (on paper, electronically).
5. Apply the knowledge gained in specific (ie a particular job situation) and general (ie overall problem solving capabilities) circumstances during your professional working life.
6. Appreciate the global applicability of skills developed whilst (most likely) studying with students from abroad.
7. Use the outcomes given above to assist in becoming fully professional engineers in the shortest possible time.

**The Syllabus:**
- Drilling programming.
- Performance and performance measures. Incentivisation. Well design project covering areas of well planning to provide optimum production and injection performance.
- The optimum well design to reach the specified target location ensuring safety.
- Maximum integrity and reliability at minimal costs. Selection of optimum well trajectories.
- Equipment selection.
- Drilling.
- Completion and workover planning and scheduling.
- Rig selection and cost estimate.

**Teaching and Learning Arrangements:**
Lecture: 5 hours (4 x weekly)
Tutorial: 5 hours (4 x weekly)
Other: 20 hours (4 x weekly)

Awarding of Grades:
To pass this unit you must:
- Achieve an overall grade/mark greater than or equal to 5/50.
- Achieve an examination mark of at least 55%

Late Submission:
Penalties for late submission of assessed work may apply as follows:
- Refer to Guidelines.

Grade Awarded:
This is a grade/mark unit.
The final examination will be held during the formal examination period. It is the student’s responsibility to check the date and time of the final examination.

Official release of results for this unit will be published on Oasis on the Curtin web site.

GENERIC INFORMATION

Student Rights and Responsibilities
It is the responsibility of every student to be aware of all relevant legislation and policies and procedures relating to their rights and responsibilities as a student. These include:
- the Student Charter
- the University’s Guiding Ethical Principles
- the University’s policy and statements on plagiarism and academic integrity
- copyright principles and responsibilities
- the University’s policies on appropriate use of software and computer facilities

Information on the University’s “Student Rights and Responsibilities” is available at web page:
http://students.curtin.edu.au/administration/responsibilities.cfm

Enrolment and HECS: it is your responsibility to ensure that your enrolment is correct - you can check your enrolment through the eStudent option on OASIS, www.oasis.curtin.edu.au, and you can also print off an Enrolment eAdvice.
**Semester 1:** you can make requests to have corrections made to your enrolment up to 31 March. The University will not change records after 31 March. HECS liabilities (where they apply) and your results depend on your 31 March enrolment. Withdrawals made after that date will not reduce your HECS liability.

**Semester 2:** you can make requests to have corrections made to your enrolment up to 31 August. The University will not change records after 31 August. HECS liabilities (where they apply) and your results depend on your 31 August enrolment. Withdrawals made after that date will not reduce your HECS liability.

**ENGINEERING/UNIT SPECIFIC INFORMATION**

**Referencing style:**
Curtin Engineering advises students that Curtin University supports the "Chicago Referencing Style" for written work and oral presentations. For a guide to this style please see [http://library.curtin.edu.au/referencing/index.html](http://library.curtin.edu.au/referencing/index.html)

However, students are permitted to use other recognised styles that appear in the Engineering literature. Note also that individual lecturers can stipulate that a particular style is used when it best matches the type of work in the assessment of the particular unit.

**Unit Coordinator Details**
A/Professor Jorge Sampaio
